[Utah_09122017_overview.pdf](#)

I do apologize but more edits are needed- and ASAP. Meeting is tomorrow morning so not a lot of time here. Let me know if I should get on the phone with Brian.

Also need a new map- The whole state of Utah with both monuments on the map. Lets keep it simple but as consistent color wise as these other maps.

1. BENM existing boundary with all the different land designations with different colors (green for USFS, yellow for WSA, purple for the monument). Forgot shading in the boundaries, we are going back to our original approach. However please BOLD the black boundary line so it is easy to see. Also please REMOVE the land designation color scheme for outside the boundary. Make everything brown outside the boundary. No need to label. Laso please remove and red roads.
2. BENM proposed boundary with all the different land designations with different colors (see above). Keep the BOLD black proposed line. Please shade in the NEW boundaries with light blue. Also please REMOVE the land designation color scheme for outside the boundary. Make everything brown. No need to label. Laso please remove and red roads.
3. GSENM existing boundary with all the different land designations with different colors (yellow for WSA, etc). Forgot shading in the boundaries, we are going back to our original approach. However please BOLD the black boundary line so it is easy to see. Also please REMOVE the land designation color scheme for outside the boundary. Make everything brown. No need to label. Also please remove and red roads
4. GSENM proposed boundary with all the different land designations with different colors (see above). Keep the BOLD black proposed line. Please shade in the NEW boundaries with light blue. Also please REMOVE the land designation color scheme for outside the boundary. Make everything brown. No need to label. Also please remove and red roads.
5. As noted above, A map of the state of Utah, generally brown, but with blue boundaries reflecting the EXISTING monuments - again please just make colors consistent.
